

Gregory Hall

President of Century 3, Inc.

Greg Hall is the President of Century 3, Inc. (C3), a global engineering and construction firm headquartered in Greer, South Carolina. He is also the Chairman of C3 China, with offices in Shanghai, Dalian, and Xian; and Director of C3 Southeast Asia, which includes Vietnam, Malaysia, Singapore, and Thailand. Mr. Hall is very involved in sustainable and renewable energy initiatives such as solar and biomass.

As President of C3, which was established in 1977, Mr. Hall continues the company's tradition as self-perform industrial contractors specializing in facility and equipment relocations in the Southeastern United States. Under his entrepreneurial leadership since 2004, C3 today has grown into a full-service company that performs site selection, master planning, facility relocation, process equipment installation, engineering design, procurement and sourcing, and construction management for heavy industrial and complex manufacturing facility projects across the Americas, Europe, and Asia. The company works primarily with Fortune 500 clients in diverse industries including aerospace, avionics, automotive, chemicals, pharmaceuticals, consumer products, electronics, semiconductors, energy (biomass, solar, wind, hydro power), food and beverage, general manufacturing, and commercial buildings.

Prior to his current position with C3, Mr. Hall was recruited in 1995 to join CH2M HILL as a Senior Vice President located in Portland, Oregon. He helped the firm successfully expand its business into Europe, the Middle East, Japan, Asia, and China. He oversaw worldwide sales, marketing, and strategic client accounts, as well as directed operational excellence in these new geographies. Mr. Hall was also a key member of the due diligence team that assessed and ultimately purchased Lockwood Greene for CH2M HILL.

Prior to this work, Mr. Hall was Vice President of Global Business for Jacobs Engineering, where he led expansive growth in the advanced manufacturing and semiconductor markets around the world. Before that, he was Vice President for CRS Serrine (acquired by Jacobs in 1993), joining the firm in 1984. Mr. Hall started his career with Exxon in 1979 as a project manager in New York City, New York. After finishing Exxon's comprehensive project management training, he was sent at a young age to Greenville, South Carolina, to manage the construction of various research and development facilities for the company.

Mr. Hall is an active member of CoreNet Global, which is an internationally recognized industrial economic development organization. He graduated from college in New York with a business degree, and completed the Executive Leadership Program at the University of Michigan's Ross Graduate School of Business.

In addition, Mr. Hall is a true aviation enthusiast, has held an airline transport pilot license since 1984, and is the owner of Fairview Airport located in Landrum, South Carolina, which is between Asheville, North Carolina and Greenville/Spartanburg, South Carolina. Fairview Airport services private aircraft visiting the Carolinas for business purposes.
